ParcelTrack Lite · Integrated superclass and subclass ERD

1..1 = exactly one 0..1 = optional one 0..* = zero or many 1..* = one or many

Solid lines: stored associations Hollow triangle: inherits from USER Dashed line: administrative operation

PK = primary key FK = foreign key UK = unique key ? = nullable. Each subclass user_id is its PK and a FK to USER.id.

USER history and audit associations apply to all three subclasses. ADMIN assignment is logged in AUDIT_EVENT; PARCEL has no admin_id.

PARCEL unique pair: (seller_id, client_request_id). Recipient fields and fingerprint may be cleared after anonymization.

Implemented in 0004_integrated_erd: subclasses, proof schema and initial history. Upload and finalization endpoints remain planned.
